## South Carolina Regulation 61-69

### Classified Waters

---

On May 28, 2004, Regulation 61-69 was amended. This copy is a reprint of the State Register version. If there are inconsistencies between this version and the version printed in the May 28 2004 State Register, the State Register version takes priority. The State Register's internet web site is: <http://www.lpittr.state.sc.us/regs.htm>

Authority for this regulation comes from Sections 48-1-10, et seq. of the 1976 South Carolina Code of Laws. For questions, contact DHEC at:

## **R.61-69, CLASSIFIED WATERS**

- A. Criteria for Classes: All adopted classifications must conform to the standards and rules contained within the Water Classifications and Standards (Regulation 61-68) or site-specific standards listed within this Regulation (61-69). Unless noted, site-specific standards apply only to the water named and not to tributary or downstream waters.
- B. Tributaries to Classified Waters: Where surface waters are not classified by name (unlisted) in this Regulation, the use classification and numeric standards of the class of the stream to which they are tributary apply, disregarding any site-specific numeric standards for the named waterbody. In tidal areas, where an unlisted tributary flows between two differently classified waterbodies, the more stringent numeric standards of the classified waters apply to the unlisted tributary, disregarding any site-specific numeric standards for those waterbodies.
- C. Status of Classifications: The classification for all bodies of water contained herein supersedes all previous classifications.
- D. The classifications listed within this regulation shall be open to review to ensure that the classification use is still valid and justified.
- E. The Department may determine in accordance with Section 312 of the Clean Water Act that for some waterbodies (or portions of waterbodies), the designation of No Discharge Zone (NDZ) for Marine Sanitation Devices (MSDs) shall be enacted with application of the existing classified standards of the waterbody. The designation is listed in this regulation as an NDZ following the waterbody name.

### **Class Abbreviations Used in Regulation 61-69**

Outstanding Resource Waters	ORW
Shellfish Harvesting Waters	SFH
Trout-Natural	TN
Trout-Put, Grow, and Take	TPGT
Freshwaters	FW
Class SA	SA
Class SB	SB

An "\*" by the class means the Department has established site-specific standards for certain parameters for that waterbody. The site-specific standards are listed in parentheses.
